

Internship Sharing

—Kelly

“During my internship in WTS, I learned a lot.”

During my internship in WTS, I got along with my colleagues in a relaxed and friendly manner, which enabled me to learn new skills and work happily. The internship is happy and short. I sincerely congratulate WTS China on getting better and better.

During the summer internship at WTS, I learned a lot. I am very grateful to the company for giving me such a valuable opportunity to improve myself and learn in the short internship time. Here are some of the insights and discoveries I've made during my internship:

- ✓ First of all, after I was hired as an administrative intern, the first thing I realized was the importance of time management. As an administrator, I manage all kinds of company affairs. Sometimes I receive many tasks at the same time, and I need to arrange my time reasonably to complete them.
- ✓ Secondly, I also exercise my independent thinking ability and judgment at work. In some work arrangements, I am given a lot of space for self-play, which requires more self-judgment and thinking, which better improves my ability to independently thinking. For example, when making small designs for newsletters, covers, and business cards, I often get great space for self-selection and production and also receive positive comments and encouragement.
- ✓ Finally, since the working environment in the company is basically applicable to English, my English level also improved during the internship, which also urged me to pay more attention to the cultivation of my second language ability.
